

MISSION STATEMENT

"The official mission of BCI is to bring skill based education to all persons wanting a career in allied health care"

HOSPITAL CENTRAL SERVICE TECHNICIAN - ADVANCED

Meeting Time: Monday through Friday (regular class schedule)

Instructors: TBA

Office Address: 422 Main St, Malden MA 02148

320 Washington St, Brookline, MA 02445

Office Phone: Malden (781)333-3522 - Brookline (617)383-6058

E-mail: TBA

Office Hours: By appointment

Text: IAHC SMM CRCST 8th Edition and Workbook

Admissions Requirement: High School Diploma or Equivalent

I. Course Description

An intensive, hands-on course of study developing essential skills necessary to enter the field of Central Supply and Infection Control within a hospital or industrial settings. Course participants will participate in a wide variety of classroom activities centered on decontamination and sterilization of surgical instruments and prosthetic devices.

II. Course Goals and Objectives

Students will gain familiarity with;

- General Medical Terminology
- Basic Human Anatomy
- Basic Microbiology in Central Supply
- Central Supply and Infection Control Departmental Mission

- Understanding and Adherence to Standard Precautions Policies and Protocols
- Instrument Identification
- Instrument Handling
- Introduction to Organic and Inorganic Solvents and Solutions
- Principles of operation of Sterilizes
- Equipment Decontamination Procedures
- Equipment Sterilization Procedures
- Sterile Wrapping and Packaging
- Equipment Storage and Distribution

Allied Health Seminars are incorporated into the advanced practice program (See Below)
goals of this model curriculum are to:

III. Class Expectations and Assignments

The course is designed to integrate discussion and interaction of students on the multiple knowledge areas. Students are expected to spend about 2 hours reading assigned materials, watch associated videos and presentations and/or work on a group project before and after each class. Class participation will be assessed by attendance and participation in in-class learning activities. Display professionalism in regards to ethical and responsible behavior in compliance with clinical and educational standards.

IV. Grading

Each student must attain a grade of 75% or higher to pass

The final grade is made up of:

- Quizzes – Beginning of each class
- Skills Competency as evaluation of class Participation
- Final Exam

A cumulative final grade below 75% is considered a failing grade. The student is allowed one make-up test. In case the student fails the make-up test, he/she will be offered remedial classes for a prorated fee based on the number of sessions.

V. Outcomes

At the completion of this class students will be able to demonstrate the following:

- Demonstrate basic technical skills in managing the process for surgical instrumentation sterilization, inventory control and supply chain management, and information technology as it relates to the sterile processing environment.
- Demonstrate professional behaviors of caring, accountability, responsibility, respect for the quality care of patients, acceptable attitude and attire, and organization and time management skills.
- Utilize critical thinking skills as a basis for clinical judgment and anticipatory decision making when managing all tasks related to sterile processing.
- Effectively apply verbal, nonverbal, and written communication principles and skills in classroom.
- Maintain industry standards of quality control and safety principles in the workplace.
- Uphold legal and ethical standards and adhere to principles of patient confidentiality within the health care community environment as defined by HIPAA.

VI. Didactic Classes (Monday, Wednesday, Thursday on a rotating schedule)

- Medical Law and Ethics
- Electronic Health Records
- Computers in Medical Practice
- Understanding Health Insurance
- Medical Transcription
- Medical Terminology
- Human Anatomy and Physiology
- OSHA Blood-borne Pathogen

VII. Clinical Internship – 400 Hours in a hospital setting in compliance with IAHCSSM

Student success is our priority, don't hesitate to ask questions and always give your best!!!!
Good Luck

WEEKLY TOPICS AND LABS

Each week a new topic will be introduced with audio-visual presentation coupled with a lecture and demonstration. A lab period is allotted on a different day where students will practice hands-on clinical skills.

TOPIC	LAB	WEEK(S)
Medical Terminology Essentials	Infection control	1
Medical Terminology Anatomy	Infection Control	2 - 3
Microbiology	Environmental Lab	4 – 5
Tools for Cleaning	Water Detergent lab	6 -7
Disinfection Decontamination	Decontamination Lab	8-9
Packaging Materials	Packaging lab	10
Steam Sterilization Essentials	Steam Sterilization lab	11-12
Low Temperature Sterilization	Low Temp lab	13-14
Surgical Instrumentation	Instrument Lab	15-16
Complex Surgical Instruments / Endoscope	Endoscope Lab	17-18
Regulatory Agencies	Sterilization / Decon	19-20
Patient Care Equipment	Sterilization / Decon	21-22
Inventory Management	Sterilization / Decon	23-24
Exam Review	Mock Exam	
Exam Review	Mock Exam
