I. Course Description
Through lecture, discussion, and role-playing in large and small groups, students learn appropriate verbal and nonverbal behavior to be used with patients, families, the health care team, and the greater community.

II. Course Goals and Objectives
The goals of this model curriculum are to:

- Create and sustain a therapeutic and ethically sound relationships with patients
- Utilize effective listening, nonverbal, verbal and writing skills to elicit and provide information
- Modify communication style as needed for individual patient interaction
- Collaborate effectively with physicians, other disciplinary team members, and professional groups
- Employ human behavior concepts to effectively manage the patient’s care

MISSION STATEMENT
“The official mission of BCI is to bring skill based education to all persons wanting a career in allied health care”
• Demonstrate emotional resilience and stability, adaptability, flexibility and tolerance of ambiguity and anxiety

III. Class Expectations and Assignments
Students will be expected to practice self-study through reading assigned materials, reviewing pertinent resources and/or working as a group on assignments.

IV. Grading
Each student must attain a grade of 75% or higher to pass
The final grade is made up of:
• Attendance
• Homework
• Final Exam
A cumulative final grade below 75% is considered a failing grade. The student is allowed one make-up test. In case the student fails the make-up test, he/she will be offered remedial classes for a prorated fee based on the number of sessions.

V. Outcomes
After studying all materials and resources presented in the course, the student will be able to:
• Develop knowledge of the potential impact of effective versus ineffective communication used in a health care environment with patients, clients, consumers, families, the health care team and the greater community
• Demonstrate basic verbal and nonverbal therapeutic communication skills and professional behavior important in the health care setting.
• Develop sensitivity to basic issues of diversity in health care communication.
• Demonstrate effective ways to manage anxiety and prevent job burn-out.
